**KOT**  
 Clean and informative Kitchen Order Tickets will increase productivity of your kitchen, it also reduces errors.

**Tablet Ordering**  
 When your waiter/captain took order with tablet, it does not only seems premium but also save floor time of staff that can be used towards better guest experience.

**Self Ordering**  
 With self order application customer can order, KOTs will be generated, waiter or manager can see that order and add items on that order. It brings more time to staff for better guest service.

**Fast Billing**  
 Swift turn around is a key factor to success for any restaurant and our fast billing method complements this thought with multiple payment options.

**Table management**  
 Arrangement of table can be set on screen as on floor by drag and drop for better visual understanding.

**Take away**  
 Take away orders needs some extra attention like different tax group and our software knows that.

**Fast and secure**  
 Spending 15 years in software industry, we know the value of consistence and security. With industry level security our cloud are ready to bring you fast and secure experience.

**Stock Management**  
 With easy purchase, sales, garbage and transfer entries all stock can be managed efficiently using various stock reports.

**Multiple restaurant with multiple kitchen**  
 Facilities with more than one kitchen and/or restaurant can manage all kitchen and restaurant from same screen. Cross kitchen ordering can be done when needed.

**Advanced level of access layer**  
 Multiple level of access allows to manage authority and decide responsibility, which leads to less errors.

**Integration with eSMART HMS**  
 eSMART HMS provides smooth operations for accommodation business and integration gives seamless experience of hospitality.

**Accounting**  
 Full featured accounting is integrated with our software. Track your accounts/ ledgers or make adjustments, all at one place.

**Home Delivery**  
 Many accurate information needed when you deliver food to customers at their door step, our software provides those information when you need them taking orders.

**Reservation by application**  
 One can also reserve a table from mobile using our application for your restaurant.

**OEM application possible**  
 We also offer self order application published with your own restaurant name, with some additional charges.
