

NCTS

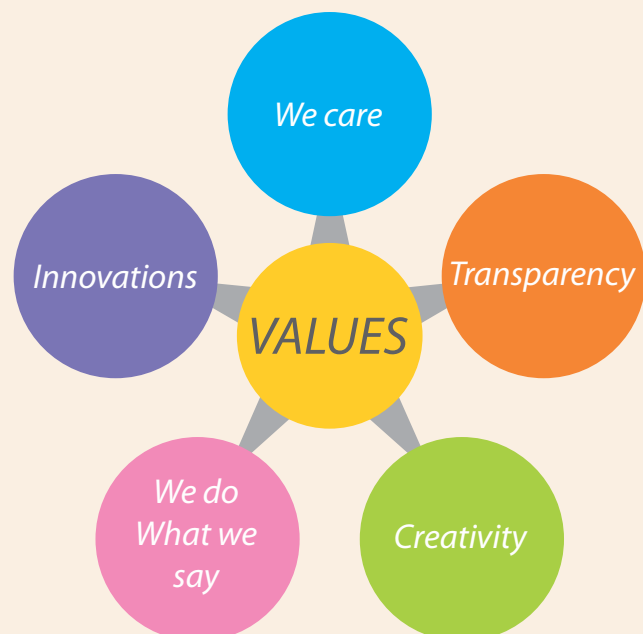

PROFILE >>>

Vision

To be the most preferred, innovative global company that provides products & solutions in the field of cloud computing.

Mission

To fulfill all customer requirements through customized solutions with accuracy & velocity.

About us

New Computer Technology Solutions, LLC (NCTS), a group company of Smartstation International Ltd. (HK) has been incorporated with a mission to develop Educational Solutions using Intel reference designed Tablets, 2 in 1 Tablets, Thin Client and Mini PC based IT Solutions that seamlessly integrate with your business processes and goals.

NCTS promotes all products with "SMARTSTATION" as Brand.

NCTS aims to be your Reliable IT Partner who delivers value through quality and cost effective Hardware Services. We have a strong customer-focus with the right amalgam of personnel, technology, infrastructure and alliances. Established in 2009, SMARTSTATION is a creative, professional and enthusiastic team which has rich experience in designing, producing solutions as per customer's requirements since 1998.

The objective of NCTS is to provide customers with high quality, high efficiency and environmental friendly products as well as comprehensive solutions.

In new era of Cloud Computing technology with VDI support, "SMARTSTATION" had also adopted new technology and made thin clients ready to cop up with new dimension.

SMARTSTATION thin clients are available with VMware, Citrix, Red hat & Microsoft for VDI Solutions. NCTS focused purely on

Emerging ICT SMARTSTATION brand TABLETS, THIN CLIENT, CLOUD CLIENT and MINI PC products. NCTS also focused purely on servers & virtualization solutions includes:

CITRIX

vmware™

userful

Quality

Consistent delivery of the highest quality products is NCTS promise to customers.

Innovation

NCTS will always strive to develop innovative technologies and produce world class products.

Expansion

NCTS with motive to expand in new horizons, expansion in technology adoption, associated partners and alliance with technology provider in new areas with strong presence.

Rugged Design

SMART Education 2 in 1 tablet combines a shock-absorbing, rubber mid-frame with a tough, easy-to-grip textured exterior that can handle a fall from 70 cm and take life in a backpack without scratching or denting.

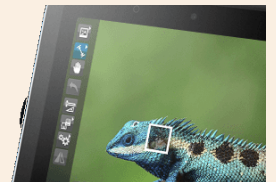

Stylus with tablet

Students can draw, take notes and navigate intuitively using their fingers and multi-touch gestures. For fine and detailed work, the included stylus offers precise control.

Cameras

It has twin, onboard cameras, 1.2 MP front and 5MP rear, so students can work collaborative via video, shoot footage and capture stills to document projects. Students can snap on the included magnifying lens and turn the rear camera into a microscope.

Sensors

A thermal probe and SPARKvue® software that lets student scientists sample and record temperatures, graph changes over time, analyze and draw conclusions about physical phenomenon.

Temperature Probe

Make quantitative lab work more immediate and interactive with temperature probe and companion app. Students can sample temperatures, analyze and graph results as their experiments unfold.

Magnifying Lens

Transform lab camera into a microscope that can reveal the hidden structures and wonders of the world using this simple, snap-on lens that adds magnification to the 5MP camera.

Detachable Keyboard

It is a true 2-in-1 that delivers the easy use of a tablet with the high-productivity of a full-size keyboard. The keyboard features a reversible dock, so the screen can be used facing the student for individual work or facing the world for presentations and group activities. Closed, the keyboard protects the screen and gives the student a built-in handle for carrying.

Unique Features

1. Built to withstand bumps and accidental drops of 70 cm
2. Comes with a temperature sensor probe, front and rear cameras, and a snap on magnification lens
3. Up to 8 hours battery life to last a full school day
4. Passive stylus with pen-like grip
5. Pre-loaded Intel® Education Software to engage students using 21st century technology tools

Intel® EDUCATION SOFTWARE

This Intel Education Tablet includes a comprehensive suite of applications designed to foster communication, collaboration, problem solving, critical thinking, and digital literacy in students. It empowers educators to efficiently manage their classroom while enabling IT to promote safe computing practices.

RUGGED DESIGN

SMART Education 2 in 1 tablet combines a shock-absorbing, rubber mid-frame with a tough, easy-to-grip textured exterior that can handle a fall from 70 cm and take life in a backpack without scratching or denting.

STYLUS WITH TABLET

Students can draw, take notes and navigate intuitively using their fingers and multi-touch gestures. For fine and detailed work, the included stylus offers precise control.

Intel® Education Application Kit

CLASSROOM MANAGEMENT

Classroom Management is a collaborative classroom-learning solution used to deliver lesson content, receive student work, administer assessments safely and securely, and eliminate online distractions. The app provides educators with tools to deliver interactive lessons, monitor student learning with quiz functions, administer assessments, transfer files, monitor student screens, and chat with individual students.

SPARKvue*

SPARKvue brings real-time sensor data collection, visualization and analysis to an inquiry-based science learning environment. Students use modern science tools to explore the world around them, building science and technology literacy as well as developing critical thinking and problem solving skills.

Intel® Education Lab Camera by Intellisense

Lab Camera is a science exploration application with seven tools that help students carry out observations and measurements using the tablet's built-in camera. It's a cost effective way to enhance a STEM curriculum and promote scientific inquiry.

Pixlr*

Pixlr is a fun and powerful photo editor that lets students quickly crop, rotate, and finetune any picture. Advanced features like masking, double exposure, and blending help students transform their photos into works of art.

Kno™ app

The Kno™ app is an interactive PDF e-Reader designed for education. It can enhance the learning experience by helping to increase student engagement and improve study habits. Students can make more efficient use of study time using highlighting, note taking and journal features. These tools assist educators in implementing study methodologies to help improve student comprehension and retention.

McAfee® Mobile Security

Today's students live online completing homework assignments, doing research, and socializing with classmates. All the advantages of digital life also come with increasing security risks. McAfee AntiVirus Plus enforces safe and secure computing practices by proactively protecting devices from exposure to malware.

SMART 2530

A Step towards technology

- ARM Cortex A9(HI3716M)
- 512MB DDR3-1200
- 4 GB Flash Storage
- 10/100 MBPS LAN
- VGA x1 (optional HDMI port)
- 4x USB 2.0 (Integratedx1)
- VGA upto 1920x1200@60Hz
- Wifi, Support 802.11b/g/n (optional)
- Line Out, Line in/Microphone
- 3 Year Warranty

Small Size, Big Performance

There are plenty of slim and powerful Thin Client. The following model breakdown and in-depth configuration to help you find the one that best meets your specific needs.

SMART 2370

A Step towards technology

- ARM 1.12 GHz Dual Core Processor
- 512MB DDR3-1200
- 2 GB Flash Storage
- 10/100 MBPS LAN
- VGA & HDMI port
- 4x USB 2.0
- Linux Support
- 3 Year Warranty

SMART ZERO CLIENT

A Step towards technology

All the users access to same system and set of applications which are installed and controlled by IT administrator. Centralized processing and housing of applications provide better security and larger cost saving compared to normal PCs.

The total solution includes two parts, NetPoint Server Software and Smart Zero Client.

NetPoint Server Software (Free) is installed on the Host PC, it enhances the overall functionality and usability of the Server/PC by offering flexible Windows OS support, secure desktop roaming, centralized management and broad peripheral support.

Smart Zero Client is a client device which allows the users to access a session of an Operating System remotely.

Features

- Dramatically reduce your computing costs
- Easy to install, simple to manage
- Zero endpoint management

Benefits

- Reliable Audio
- Seamless User Experience
- User-friendly Interface
- Broad Peripherals Support

Smart Zero client USB transparent transmission technology that no drivers required on zero client for – just a native Windows driver is required. To further optimize printing, the NetPoint software solved a remote printing bug of Windows, ensuring that only one printer copy for a single printer is generated on the host computer system.

Plug & Play into

Digital Signage / POS / Mini PC / Information Kiosk / TV

Area where we can use

Home, University, College, School, Hospital, Healthcare, Industry, Sme, Enterprise, Soho, Governments, Hotel, Hospitality, Banking, Finance, Logistics

SMART 2350

A Step towards technology

- ARM Cortex A9 1.0 GHz
- 512MB DDR3-1200
- 512 MB Flash Storage
- 10/100/1000 MBPS LAN
- DVI x 1 & VGA x1
- 5x USB 2.0 (Integratedx1)
- Vesa Mounting
- Wifi, Support 802.11b/g/n (optional)
- Line Out, Line in/Microphone
- 1 Year Warranty

SMART 2590

A Step towards technology

- AMD Fusion T40N 1.0 Ghz (DC)
- 2 GB DDR3-1200
- 8 GB Flash Storage
- 10/100/1000 MBPS LAN
- VGA & DVI Port
- 5x USB 2.0
- 1x PS2
- Dual Display (Optional)
- Line/Mic in, Line Out
- 1 Year Warranty

SMART 9190

A Step towards technology

- Intel Atom Cedar Trail D2550
- 2 GB DDR3 RAM, 1066 MHz,
- 8 GB SATA DOM or
- 2.5" SATA HDD/SSD or mSATA
- 1 x DVI-I, 1 x HD Out
- 6 USB, Mic in, Headphone out,\
- 2 x PS/2, 1 x Parallel Port,
- 2 x Serial Port, 1 x Kensington Lock
- Realtek RTL811E GLAN x 2
- Card Reader 4 in 1
- Spdif Out, Line/Mic in, Line Out
- Wifi, Support 802.11b/g/n (optional)
- Line Out, Line in/Microphone
- 1 Year Warranty

SMART i6 INTEL Mini PC

- Intel Bay Trail-T CR - Z3735F
- Quad core 1.33GHz (Up to 1.83GHz)
- 2GB DDR3 RAM
- 32GB Flash Storage
- 10/100 MBPS LAN
- WI-FI a/b/g/n/ac
- Bluetooth 4.0
- Full size HDMI
- 3x USB 2.0
- 1 Year Warranty
- Micro SD support up to 64GB

Small Size, Big Performance

There are plenty of slim and powerful Intel mini PC.
The following model breakdown and in-depth configuration to help you find the one that best meets your specific needs.

Plug & Play into

Digital Signage / POS / Mini PC / Information Kiosk / TV

Area where we can use

Home, University, College, School, Hospital, Healthcare, Industry, Sme, Enterprise, Soho, Governments, Hotel, Hospitality, Banking, Finance, Logistics

World's smallest PC

Smart HDMI Intel Stick

- Intel Bay Trail-T CR - Z3735F
- Quad core 1.33GHz (Up to 1.83GHz)
- 2GB DDR3 RAM
- 32GB Flash Storage
- WI-FI a/b/g/n/ac
- Bluetooth 4.0
- Full size HDMI
- 2x USB 2.0
- 1 Year Warranty
- Micro SD support up to 64GB

SMART 9550

Intelligent inside - Smart outside

Intel Core i5 1.4GHz, Max.1.9GHz CPU
3MB Cache
Core 4th (Haswell) Processor
2GB RAM (Max. 8GB) Memory
32GB Storage (Max. 2.5 inch HDD 500GB/1TB)
Onboard RTL8111E/BCM43224 1000Mbps self-adaptive
Integration Intel HD Graphics(HD4400)
Graphics card fundamental frequency-200MHz
Graphics card max fundamental frequency-850GHz
Graphics output EDP/DP/HDMI
300M Wifi

Back Ports -

1x DC port
2x Audio ports
1x Lan port
1x HDMI port
1x VGA port

Front Ports -

4x USB3.0 ports
2x USB2.0 ports

Internal Ports -

1x SATA port
1x SATA HDD onboard
1x mini-PCIE port(SSD)
1x mini-PCIE port(WIFI)
1x USB contact pin
1x LVDS port pin

Embedded / Windows 7/8/10 OS,Android OS and Linux OS Support OS

-20^o/+85^o C Working Temperature

Support 64 bit computing

Size - 13.4x12.6x3.8CM

Weight - 0.8 Kg.

Shell - Aluminum alloy shell

Consumption - 15W

Power Adapter - 12V-3A

Warranty - 3 Years
